

CeraPremier™

PRODUCT INFORMATION

Ceramide III

CeraPremier™ (Ceramide III) is a highly functional cosmetic ingredient used to repair and maintain the skin lipid barrier. Vesta CeraPremier™ is high in purity, and contains one of the most concentrated content of stereoisomer identical to the Ceramide III naturally found in human skin.

- Vesta Ingredients has been a leading manufacturer and distributor in the nutraceutical industry for over 15 years. The superior quality of Vesta Brand raw materials has always been the primary driving force of our business and the success of our clientele.
- CeraPremier™ is manufactured through an advanced fermentation process and extracted through a stringent filtration method to achieve a high purity level with more than 95% active ingredient content.
- CeraPremier™ can help to supplement and maintain healthy ceramide levels in human skin. Many skin conditions such as aging, wrinkles, atopic dermatitis, psoriasis, and acne have been associated with low levels of ceramide in the skin. The high quality and purity of CeraPremier™ can help maintain the elastic integrity of human skin and stave off wrinkles.

BENEFITS OF CeraPremier™

- Identical structure to naturally occurring Ceramide III found in human skin
- Strengthens barrier function of dry and aging skin
- Improves moisture balance of skin

Vesta®

WHY USE CERAPREMIER™?

Our bodies naturally produce Ceramide in the lipid barrier of our skin which is composed of four main lipids, the most vital and abundant one is Ceramide (~40%). There are certain factors in our daily lives such as aging, stress, dry or humid environment, UV exposure (sun), and endogenous hormones that cause a decline in healthy Ceramide levels in the skin. As a result, it is vital to supplement this loss through topical application in order to help maintain skin's elasticity, smooth appearance and hydration.

EFFICACIES

- Maintains and moisturizes skin
- Minimizes lines & wrinkles
- Restores youthful appearance
- Improves skin tone and clarity
- Protects from environmental changes
- Smoothens appearance

CHARACTERISTICS

- Appearance: White, Crystalline Powder
- Odor: nearly odorless
- Water Solubility: Insoluble
- Skin/Ingestion/Inhalation: No harmful effects have been reported
- Eyes: May cause slight irritation

PACKAGING AND STORAGE

- Store in cool dry place
- Minimum pack Size: 1kg
