## PRODUCT INFORMATION

STANDARDIZED DRAGON FRUIT EXTRACT

Vesta Ingredients has been a leader in the nutraceuticals industry for over 20 years. The superior quality of Vesta Brand raw ingredients has ensured the success of our clientele.

### Vesta CactOLean™

CactOLean™ is an all-natural, standardized fruit extract that supports weight loss. It is derived from the pitaya cactus fruit, also called “dragon fruit” or “sweet desert fruit.” CactOLean™ is a powerful antioxidant and appetite modulator, and supports lipolysis for the breakdown of lipids and fat.

### About CactOLean™

The unique metabolic mechanism of CactOLean™ has evolved in the harsh environment of the desert. The pitaya cactus “dragon fruit” provides an extract with a mechanism of action affecting metabolism and resulting in weight loss. The mechanism of action supports glycogenolysis and lipolysis, resulting in glucose moderation and appetite suppression. CactOLean™ provides remarkable antioxidant and weight-loss capabilities.

### Benefits of CactOLean™

- Appetite modulator to feel satiated
- Thermogenic effect causing body to burn fat
- Natural diuretic to minimize water build-up
- Reduces LDL, lowers Bad Cholesterol
- Lipolytic capabilities to breakdown lipids and fat
- Powerful antioxidant

Sometimes called “dragon fruit” or “sweet desert fruit”, it is like kiwi fruit, and is considered a Super-Fruit. CactOLean™ is rich in antioxidants with vitamin C, polyunsaturated fatty acids, and B vitamins. The dragon fruit has long been known for its thermogenic effects to maintain a high metabolism. It also stimulates glucagon and catabolism of our body’s energy and fat reserves. The fruit is also a mild diuretic to support the elimination of fluids and toxins. These CactOLean™ benefits support immunity, skin health and the heart.

CactOlean™ contains the enzymes Tyramine and N-Methyl Tyramine involved in appetite moderation and lipolytic mechanisms. These enzymes affect glucagon and insulin release in metabolism, resulting in a satisfied and 'full' feeling during meals. Lipolysis is the breakdown of lipids with hydrolysis of triglycerides into fatty acids. The lipolytic capabilities of CactOlean™ allows for lipolysis and breakdown of lipids and fat.

CactOlean™ supports glucagon activation which results in the use of fat reserves; therefore, weight loss. It also helps to stabilize blood sugar levels by suppressing sugar spikes. Individuals diagnosed as diabetic should consult with a doctor due to hyperglycemia effects.

Mechanism of action for CactOlean™:

- Contains the enzyme Tyramine to help remove the feeling of hunger, and to allow one to feel full or satisfied.
- Supports Glucagon activation, to utilize fat reserves and to allow weight reduction.

Consider CactOlean™ to find your slim, lean, healthier you.

### CactOlean™ Weight Loss Goals

- Decreasing Kg Weight
- Reduced Body Mass Index (BMI)
- Smaller Abdominal Circumference

### Improved Metabolic Biochemical Parameters

- Triglycerides
- HDL (good) Cholesterol
- LDL Cholesterol
- Total Cholesterol
- Glucose

Manufacturing applications: Dietary Supplement Capsules and Tablets, and Fine Chemical Form.

Recommended dose is 200 mg. It is suggested to take no more than two capsules per day before meals. This may cause a person to eat less during the day.
